

It's your health. It's personal.

OUR UROGYNECOLOGY SERVICES

When is it time to see a urogynecologist?

If you're a woman experiencing:

- An overactive bladder or frequent leakage with activities
- The sensation that something is falling from the vaginal area or vaginal bulging
- Other issues related to the pelvic floor and bladder

What does a urogynecologist do?

Urogynecologists practice in the specialized field of gynecology that primarily involves treating prolapse of female organs and incontinence, but also treat other issues related to the pelvic floor.

Dr. Stephen Seymour, a fellowship-trained urogynecologist, brings more than 20 years of experience in this field. Treatment options vary according to the diagnosis and can include conservative options, such as behavior modifications, pelvic floor physical therapy, medications where appropriate, or office or surgical interventions when necessary.

Schedule an appointment by calling **(337) 470-7801** or visit LourdesRMC.com.

Our Lady of Lourdes Women's & Children's Hospital is the only hospital in Acadiana dedicated to caring for the unique healthcare needs of women and children. Our comprehensive network of more than 130 local providers offers a seamless continuity of care and a personalized healthcare experience.

Our services are designed to fit the lifestyle and needs of today's women, from online scheduling to MyChart, your personalized healthcare app that puts all your lab results, medicines, appointments and so much more at your fingertips.
