

Hospitalist Program

The hospitalist program at FMOL Health | Our Lady of Lourdes works collaboratively with primary care providers to improve treatment efficiency and patient outcomes. Full-time nocturnist coverage ensures completion of the admission process within a few hours, regardless of the time of day. The program improves throughput via better communication with primary care providers on admit and discharge, and improved patient access to hospital beds.

Our One Call Program is designed to seamlessly coordinate access to appropriate care 24 hours a day, 7 days a week. With one call to (337) 470-5555, our team will manage all aspects of direct admissions to Our Lady of Lourdes Regional Medical Center.
